

SISAL

Natural Carpet for Interior

Width: 4m Length: 30m Thickness: 6mm Weight: 2500gm/m² Latex Backing

Benefits

Sisal is a species of flowering plant native to southern Mexico, but widely cultivated and naturalized in many other countries.

It is naturally resistant to fire and sparks, making it a good choice for hospitality. Woven in many different patterns and dyed, sisal rugs can fit almost any interior decoration.

Sisal is sustainably harvested, grows quickly and is therefore, environmentally friendly. It is anti-static and sound absorbing. The molecular structure is denser and absorbs sounds better than other types of carpet.

Care

Sisal carpeting is naturally stained resistant and stain proof and does not require excessive care.

Vacuuming a sisal carpet regularly will keep it clean. Smaller area rugs can be shaken outside to rid them of dust and dirt. If a spill or stain does occur, clean it quickly with soap and water or club soda. Blot it as much as possible and then dry it quickly with a hair dryer.

Customisation Service

We provide installation of sisal carpet and the binding of the edges. Other similar products would be our Natural Coco Flormat.
