DESIGN

Ergonomically designed to promote proper posture

Curved seat and backrest conform to natural body contours

Provides targeted support for enhanced comfort

"Made From Carpet" detail on the back

PERFORMANCE

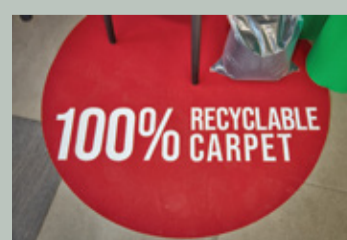

The Nue Leven Chair is built with interlocking leg connectors to ensure every seat stays firmly in place. It offers reliable stability to keep guests secure, even in the most energetic settings. From elegant ballrooms to high-capacity concert venues, the Nue Leven Chair provides both comfort and confidence in every event.

MATERIAL

Crafted from 100% recyclable ExpoFlor Rewind carpet pellets, each chair diverts up to 3 kg of carpet waste from landfills. Formerly carpet tiles, the material is upcycled through a refined process of cleaning, shredding, and converting into polypropylene pellets, then molded into durable, stylish seating.

This material choice delivers a functional, elegant, and eco-conscious solution for modern event spaces.

SPLASH

Upcycled from waste, expressed in colour.

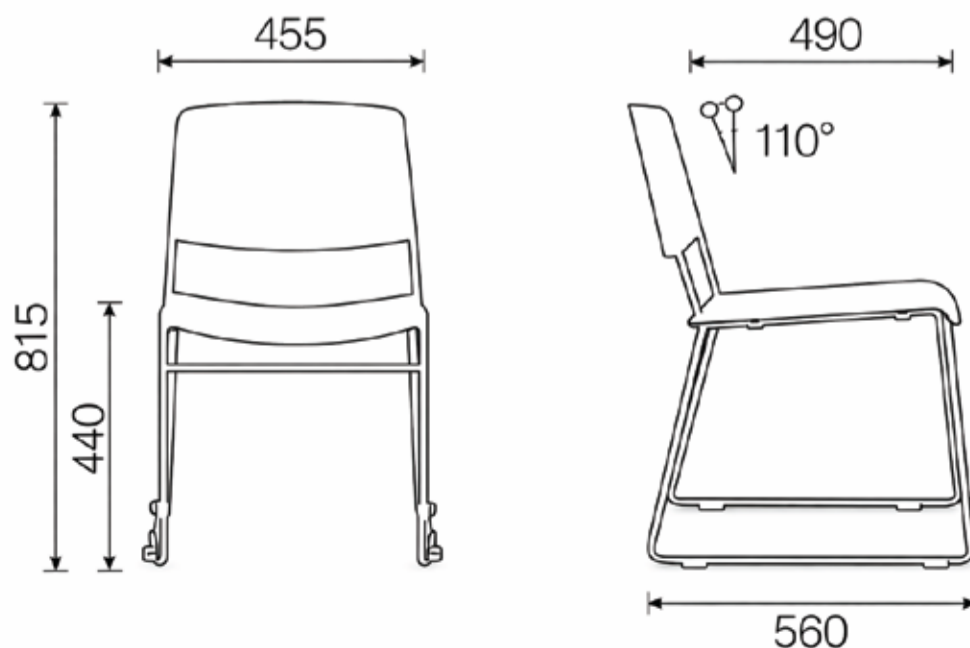

1 Made from 7m² of ExpoFlor Rewind Carpet

2 Upcycled from used event carpet polypropylene pellets

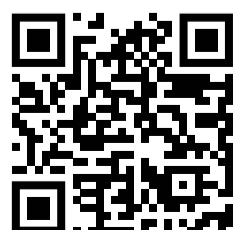

3 Lightweight and portable

4 Comes in a variety of colours

5 Designed for repeat use cycles, reducing single-use furniture waste
